ELVeS Accessories –
all from one source
What else can we offer you?

Additional to the established ELVeS Radial fibers and kits, biolitec offers a large variety of further components which might make life easier for you.

**Introducer Set, 4F Easy**  
AB 2504

In case of a complex anatomical access or vein course, the 4FR Introducer set helps you to enable the placement of the slim fibre family.

**Introducer Set, 6F**  
AB 2522

Our worldwide established 6FR Introducer Set for the ELVeS Radial or ELVeS Radial 2ring fibers.

**US Cover with sterile gel**  
AB 2882

The safe and convenient ultrasound cover with 240 cm length and sterile gel.
Go2ring slim 16G
AB 2805

Our 16GA catheter with extended length of 50mm for the fast placement of slim fibres.

TLA Needle
AB 2581

Tumescence needle extralog 120 mm in practice pack of 100.

Tubing set for infiltration
MP0009

Tube for infiltrationspump (Nouvag DP20 and DP30) to facilitate deposition of tumescence solution.

ELVeS® smart, Pullback device, Set
L-ELVesSmart-Set

The new fiber pullback device for continuous and homogenous withdrawal of all ELVeS® Radial fibers during the endovenous laser ablation of varicose veins in conjunction with the ELVeS Signal Software.

Nouvag pump
400100200

The efficient and low-noise-level pump from Nouvag for tumescence application.
